

Solving **Utility Challenges** in the construction sector

GET IN TOUCH FOR A QUOTATION

CASE STUDY VICTORIA HOUSE

830kva connection for 137 flats and 3 commercial units

AIS Utilities Limited undertook all design, civils, and installation works whilst liaising with all key stakeholders to provide a solution to the challenges identified on this project.

THE CHALLENGE

Network restrictions in the area meant that the capacity was available but only when the PSS in Feltham has its transformer upgraded (est June 2028).

DID YOU KNOW THERE IS A CAPACITY CRISIS AFFECTING SOUTH AND WEST LONDON?

OUR SOLUTION

We liaised with the M&E Consultant to review options for **reducing the load**.

We liaised with senior SSEN stakeholders to **assess the capacity constraints** and identify ways of providing the capacity to site.

THE OUTCOME

We were able to deliver the **830KVA capacity** to site.

Our solution enabled a connection to be **delivered on time and on budget**.

If your site is being affected by the current capacity issues in London please get in touch
